## OBJECTIVE

Highly motivated 3rd year Computer Science student with strong programming, Data Structures, and Algorithms skills, eager to contribute to innovative projects and learn from industry leaders through an internship opportunity.

## EDUCATION

**B.Tech in Computer Science**, Vignan University, Guntur  
CGPA: 7.95/10

**Expected 2027**  
AP, India

**Intermediate (MPC)**, Rajiv Gandhi University of Knowledge Technologies  
CGPA: 8.9/10

**2021 - 2023**  
AP, India

## SKILLS

|                              |                                                                                                                                                   |
|------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Programming Languages</b> | Java, C, Python, HTML, CSS, JavaScript                                                                                                            |
| <b>Frameworks/Libraries</b>  | Tailwind, React, Node, Pandas                                                                                                                     |
| <b>Databases</b>             | MongoDB, MySQL                                                                                                                                    |
| <b>Developer Tools</b>       | Git/Github, Google Colab, VS Code                                                                                                                 |
| <b>Academic Coursework</b>   | Data Structures, Operating Systems, CN, OOPS, DBMS                                                                                                |
| <b>Certifications</b>        | Full Stack Development Using React   Code Fiesta(2024)  Code Storm   Stack Hack (web development hackathon)   byteXL Game Development hackathon . |

## PROJECTS

**Frontend Projects - swiggy clone and student activity portal:** Built a React-based food delivery frontend with dynamic menus, cart management, and smooth UX. ([Project Link](#))

Developed an interactive campus activity dashboard with event tracking, registration, and notifications. ([Project Link](#))

**Real time Groundwater resource evaluation using DWLR data (Smart India Hackathon-2025):** Developing a web application platform with Google Maps integration to analyze groundwater levels and seasonal water trends across India by using DWLR data. Leveraging government APIs and AI insights to deliver citizen-friendly water management information. ([Project Link](#))

**Flappy Bird Game:** Developed a classic Flappy Bird Game using Python and Pygame, featuring continuous player-controlled movement and a visually appealing design. Implemented real-time user interaction and potential for future enhancements like dynamic difficulty levels. ([Project Link](#))

## ACHIEVEMENTS

Leetcode | Hackathons

June 2024 - December 2025

- Solved **170+ coding problems on LeetCode** with **100+ days Badge 2025**, strengthening problem-solving skills in Data Structures and Algorithms. ([Leetcode](#))
- Participated in many college **Hackathons and Coding Contests**
- Finalist in **Smart India Internal Hackathon 2025**, developing a solution on groundwater & seasonal water trend analysis.
